A Plain Price List for Busy People Raising Truck for Sale.

My friends tell me that my Annual Seed Book for 1906 is the best thing of the kind published in the trade. The letter press, illustrations, photographs, engravings, etc., etc., are all up to date, and everything worth growing will be found in my Seed Book fully illustrated and described. With such an elaborate catalogue, it is not necessary for me to repeat myself in this Price List to Market Gardeners. What my trucking friends require, in my opinion, is a condensed price list that can be readily referred to, and carried in the pocket. The descriptions, etc., of the varieties quoted, as stated above, will be found in my regular catalogue, which you should all have. I am glad to say that many of my friends made big money last year in the trucking business, and the prospects are they will do even better this year. I have harvested bountiful crops of everything except onion. Onion is really so scarce it is hard to say what it is worth; there is certainly not nearly enough seed to go round, and if I had wished last fall and early in the winter, I could have sold out all the seed I had at the prices quoted in this list, but preferred not to do so, as I did not want to disappoint my regular customers. A month ago good stock of Yellow Globe Danvers was selling in 1,000 pound lots at \$1.25 per pound, and today I doubt if 5,000 pounds of first-class Yellow Globe Danvers could be bought at \$2.50 per pound. This is the situation on onion, and I would advise my friends to order as early as possible. This is about the only article that is really scarce, although some varieties of peas and beans are not as plentiful as they might be. I have harvested the largest crop of seeds I have ever put in my warehouses, and am prepared this year for the largest business I have ever done in Maule's Seeds.

Trusting to hear from all my old friends and many new ones early and often, and assuring one and all I shall take the very best care of them and send them as good seeds as can be procured at any price in this country,

I remain

Always yours to command,

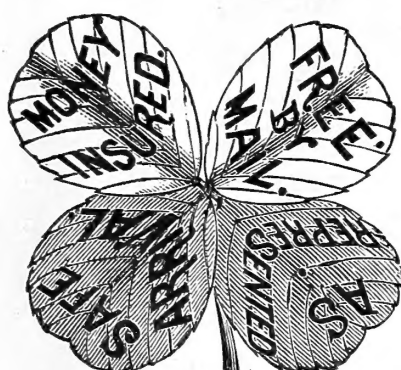

1906
Low Henry Maule

Philadelphia,
January 1, 1906.

Maule's

Special 1906 Price List for Truckers Only.

The figures quoted in the following pages are intended for those in the business of raising truck for sale, and are not intended for private planters. Please remember that since 1889 Maule's Seeds have not been sold to dealers. If wanted they must be ordered direct from Philadelphia.

My Four-Leaf Clover GUARANTEE.

1. **SAFE ARRIVAL.** I guarantee that all goods sold by me shall reach my customers in good order.

2. **MONEY INSURED.** I guarantee to hold myself responsible for the safe arrival of all remittances sent me by P. O. order, draft, check or registered letter.

3. **FREE BY MAIL.** I guarantee to deliver, free of all charges, all garden seeds, when 10 cents per pound or 15 cents per quart is added to prices quoted in this list.

4. **AS REPRESENTED.** I guarantee my seeds to be just as represented. If they prove otherwise, I will refill the order free of charge; but it must be understood that I do not guarantee the crop any further than to refill the order.

What More Could Be Asked?

I guarantee everything but the crop. Protected from loss by this most liberal of all guarantees, every one can rest assured of the most entire satisfaction.

The Prices Given in This List

Are for seeds carefully packed and delivered free on board in this city, to express, railroad or steamship company; but the purchaser **MUST** in all cases pay the freight. If you want anything sent by mail, 10 cents per pound, or 10 cents per quart for sweet corn, and 15 cents per quart for peas and beans, must be added to prices quoted. **One-quarter and one-half pounds may be ordered at the pound prices. Quarter bushels and half bushels at the bushel rate.**

TERMS:

CASH WITH ORDER, or satisfactory bank reference. Money may be sent by post office order, draft or check. If you don't remit in any of these ways, **REGISTER THE LETTER**; you can do this at any post office in America. I will send C. O. D. by express on orders exceeding \$10, if 25 per cent. of the money is remitted with the order. I cannot ship C. O. D. by freight. I receive postage stamps same as cash.

NEW ROSETTE LETTUCE.

Every fall the country over, from the Atlantic to the Pacific, Maule's Seeds carry off the honors at County or State Fairs whenever my customers take the trouble to exhibit. In reading some seedsmen's catalogue's, many people are led to believe that their seeds are the only prize winners; that such is not the case, is proven by the letter printed on page 71 of my catalogue, which is only one report from many received last fall from all parts of the country, although I make no special offer to my customers to exhibit the product of Maule's Seeds at their fairs in the fall. The products of Maule's Seeds, wherever exhibited, always speak for themselves, and win, as in Mr. Wilson's case, so many prizes that no extra inducement on my part is necessary.

MAULE'S NEW COMMERCIAL Yellow Globe Onion.

The best new variety since the Prizetaker was offered the American public. Unquestionably the best seller and best keeper of any sort now on the market. Onions harvested September 1st perfectly sound and merchantable June 1st.

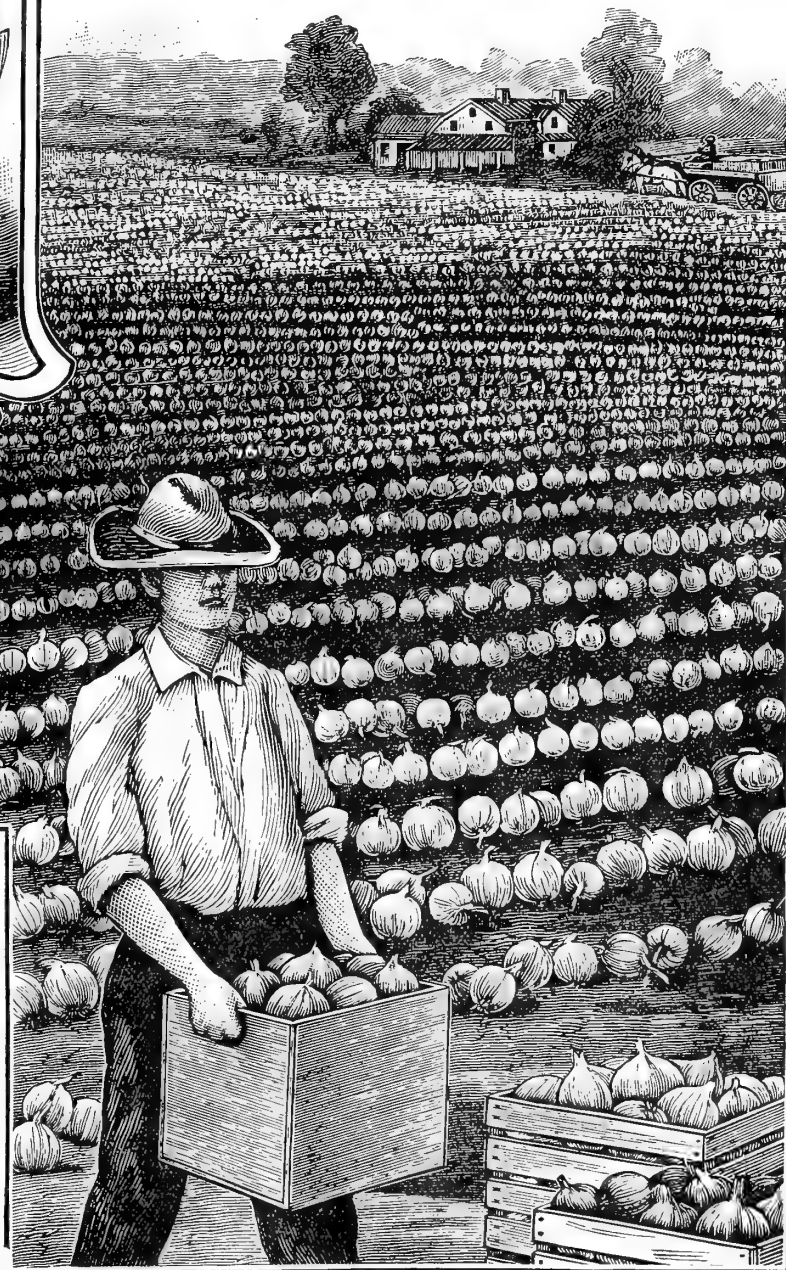

My attention was first called to the Commercial Onion three or four years ago by one of the largest growers of onions in this country, who told me that he had been for years selecting them from my original Prizetaker and breeding them down to a size that he considered more merchantable. His efforts have been rewarded by securing an onion fully as handsome as the Prizetaker in every way; of more uniform size, and whose keeping qualities were simply remarkable and decidedly superior to the parent variety. The picture above well illustrates the size and shape of the Commercial. Six hundred bushels per acre have been no unusual yield, and this quantity has been frequently surpassed. Seventeen years ago I introduced the Prizetaker onion, and in all that time I have not found a single variety that could equal, let alone surpass it, in any way, until now. I take great pleasure in offering my customers Maule's New Commercial Onion, a variety that I am satisfied will prove fully as popular and equally as desirable. As this is only the third year for the Commercial the seed is naturally scarce.

Pound, \$2.25; 10 pounds, \$22.00.

J. E. Willits, Fredericktown, Ohio.—I planted your New Commercial Onion in a box in the house on April 1st and transplanted in the open ground the middle of May in rows 18 inches apart, and 5 inches apart in the rows, and have just gathered them. They are fine, large, smooth onions, nearly globular in shape, scarcely any but are over 2 inches in diameter and many measure over 4 inches, yielding at the rate of 750 bushels per acre. I consider them a very valuable market onion.

Geo. W. Hodges, Saratoga, N. Y. Box 203. — The New Commercial Onions are symmetrical in shape, of a beautiful light straw color, very even in size with no small ones at all, of mild flavor and exceedingly solid. They ripen a few days in

advance of Yellow Danvers. They had a small top and very slim neck, and ripened thoroughly. I think they are a decided acquisition to the list of Yellow Globe Onions.

Wm. D. Carr, Hebron, Ill.—Your New Commercial Onion is entirely satisfactory. It has proved the best yielder of five varieties in my field. It roots strongly, and resists drought well, is small necked and well shaped. Average weight one pound. My new Commercial won first premium at the McHenry Co. Fair, also winning first as part of a collection of onions. Permit me to thank you for introducing so excellent a variety.

THE NEW DAVIS PERFECT CUCUMBER.

The New Davis Perfect Cucumber

A REVELATION TO EVERY GROWER.

Plant the Davis Perfect, and you will raise in the open ground, cucumbers that will sell in any market at same price as the high priced hot house forcing cucumbers.

There is no question in my mind that the Davis Perfect Cucumber is the sensational vegetable novelty for 1906. Mr. Davis needs no introduction, as the originator of the Davis Wax Bean and Grand Rapids Forcing Lettuce, he has a reputation as a market gardener for knowing what is what, second to none. Mr. Davis has for years been forcing cucumbers under glass for the Chicago and Detroit markets, and it has been his ambition to produce a cucumber that would be as handsome in appearance and sell as well grown in the ordinary way in the open ground. He has at last succeeded in perfecting a cucumber that beats anything I have ever seen; Davis Perfect is bound to become the most popular cucumber both for forcing under glass and growing outside, for the following reasons:

First. It has an ideal shape, and the handsomest color of all cucumbers.

Second. It is a type of the most perfect size.

Third. Its eating qualities surpass anything I have ever tried.

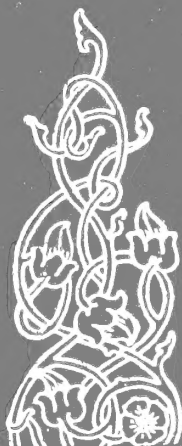

Fourth. It is almost seedless one-third of its length from the stem end, and the seeds that are contained in it when it is in slicing condition are so small and tender that they are unnoticed.

Fifth. It is enormously productive, in fact, beats anything I have ever tried.

Sixth. It does not change its dark, rich color when grown outdoors, in fact, it resembles a hothouse cucumber so closely that dealers cannot tell the difference, and are willing to pay as much for it as the hothouse production. Mr. Davis has tried every strain of new cucumber that has been introduced in the last few years; while a number of them have

been very good, he is frank in saying that his cucumber beats anything he has ever tried, and other growers in Grand Rapids are of the same opinion. The facts boiled down are simply these: I believe this is the greatest cucumber ever introduced, and it is bound to become popular everywhere when it is known. Local market gardeners in Grand Rapids, Mr. Davis home, who make a specialty of growing cucumbers under glass, have tried in vain to get this seed to sow in the open ground. It will be a big money maker for anyone engaged in growing cucumbers in the open ground, for Mr. Davis could have sold the cucumbers represented in this seed crop for more than double the price of any outdoor grown cucumber on the market. Last year Mr. Davis could have gotten \$1.00 per bushel for his entire crop, but he preferred to save them for seed, with the exception of a little patch he had near the house, and for which he got \$1.00 a bushel, both in the Grand Rapids market and Chicago, at the same time the best of the other outdoor grown cucumbers were bringing 40 to 50 cents. The dealers who handled these cucumbers for Mr. Davis wanted him to ship them in large quantities, as they could sell at \$1.00 all he could send them, no matter how large the quantity, but as stated, Mr. Davis preferred to save them for seed. It stands to reason a cucumber that can be grown outdoors and resembles a hot house cucumber so closely that the trade will pay the same price they are paying for the hot house product is worth a great deal, and it is. I predict the greatest sale any cucumber novelty has ever had for the new Davis Perfect, and every grower, whether for home consumption or for market, to be abreast of the times, must plant this variety. Further comment seems unnecessary.

Packet of 50 seeds, 20 cents; 3 packets, 50 cents.
